

- ### Individual Tooth Names
- Incisors
 - Central Incisors
 - Lateral Incisors
 - Cuspids
 - Premolars (Bicuspids)
 - Molars

Naming of Tooth Surfaces

In addition, Posterior teeth
Have an **Occlusal Surface**

MESIAL
DISTAL
FACIAL
LINGUAL
OCCLUSAL

37

Naming of Tooth Surfaces

and Anterior teeth
Have an **Incisal Surface**

MESIAL
DISTAL
FACIAL
LINGUAL
INCISAL

38

Naming of Tooth Surfaces

That surface of the tooth that is
closest to the mid-line

Mesial

39

Naming of Tooth Surfaces

That surface of the tooth that
is further from the mid-line

Distal

Distal

40

In most cases, **Mesial** surfaces of one tooth contact the **Distal** surface of another tooth.
There are two exceptions in each quadrant.

MESIAL **DISTAL**

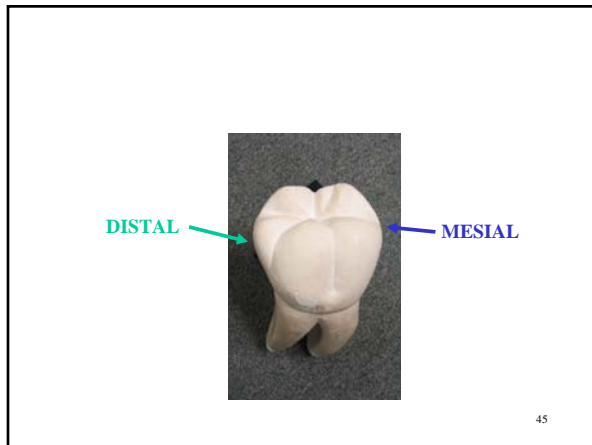

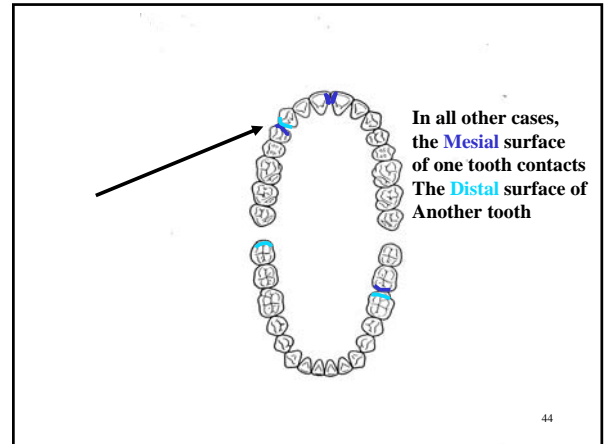

41

Exception #1:
Mesial of a Central Incisor contacts the Mesial of the other Central Incisor

Exception #2:
The 3rd Molars have no Contact on their Distal Surfaces

42

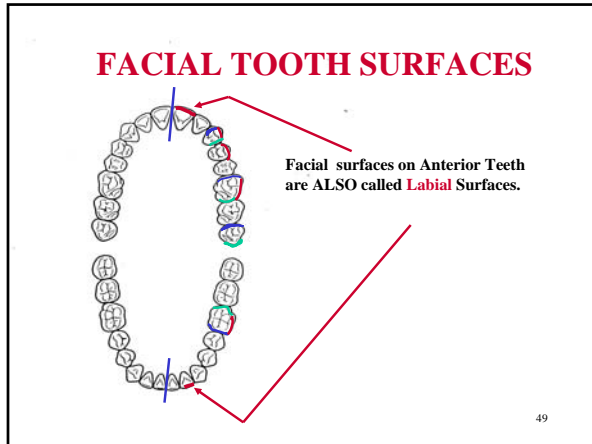

FACIAL SURFACES

THE SURFACE OF A TOOTH CLOSEST TO THE CHEEKS (FACE)

47

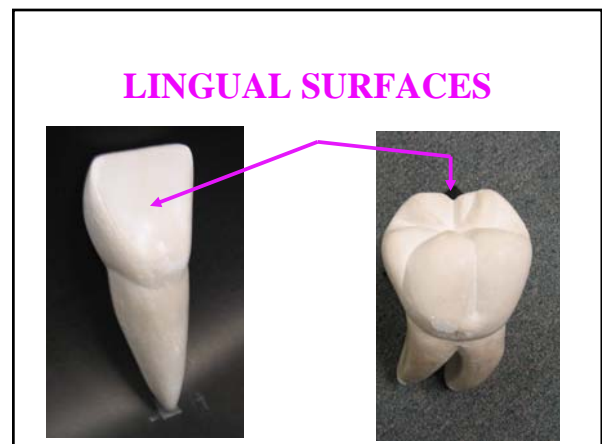

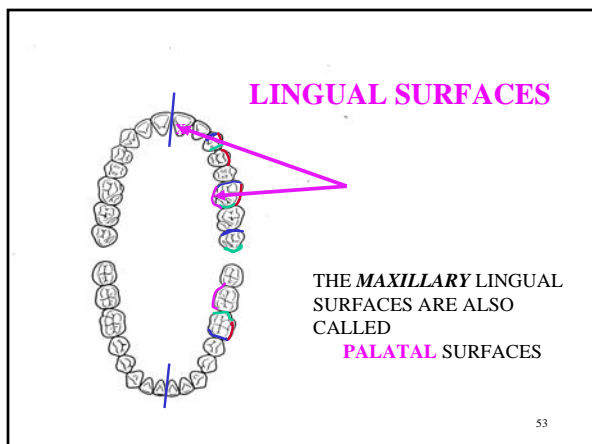

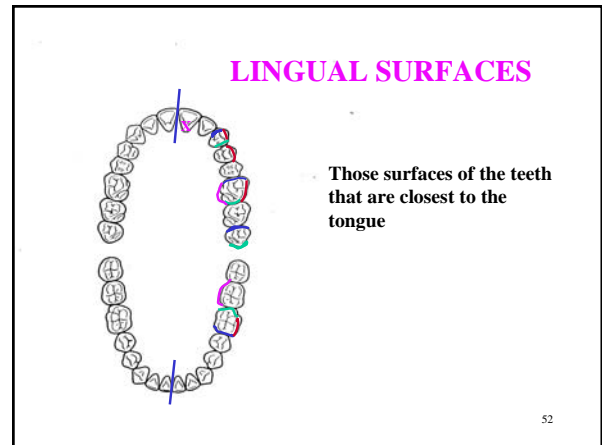

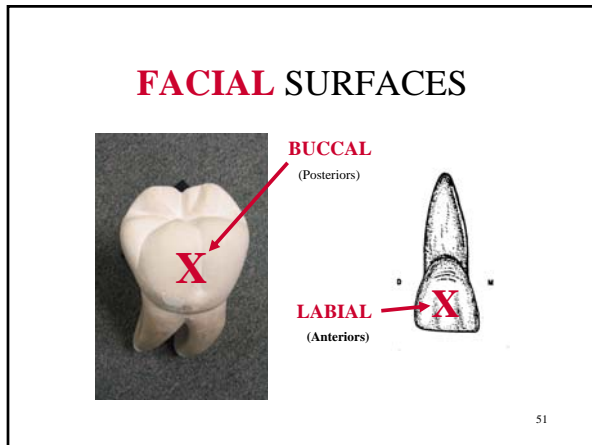

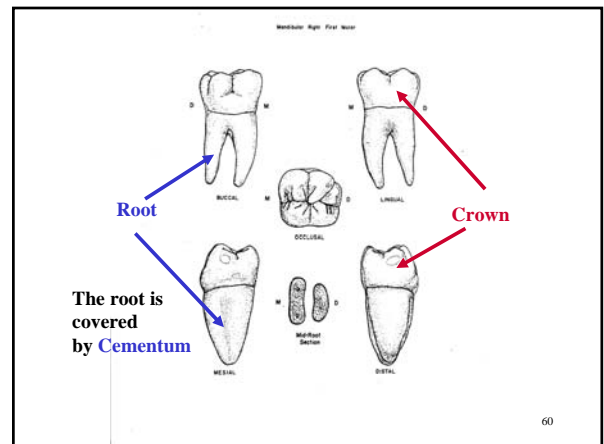

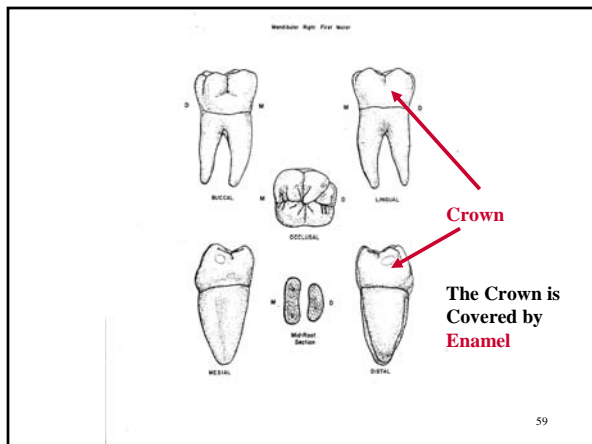

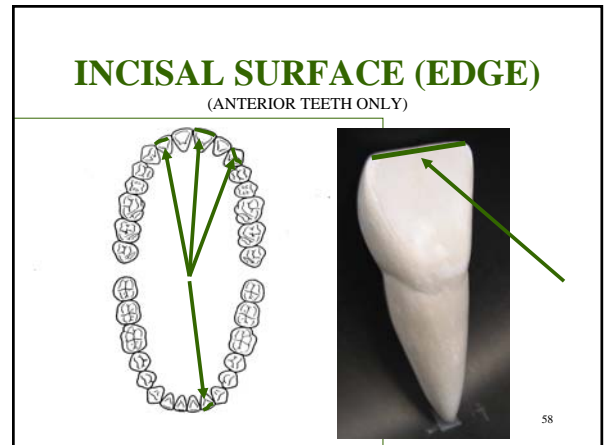

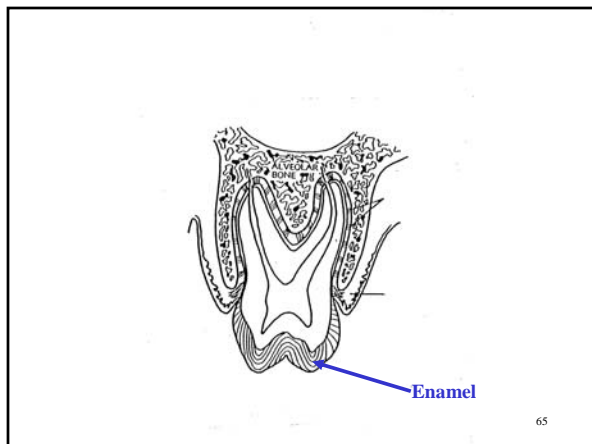

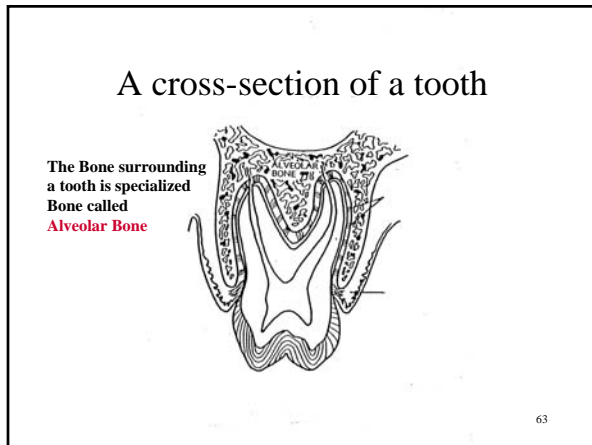

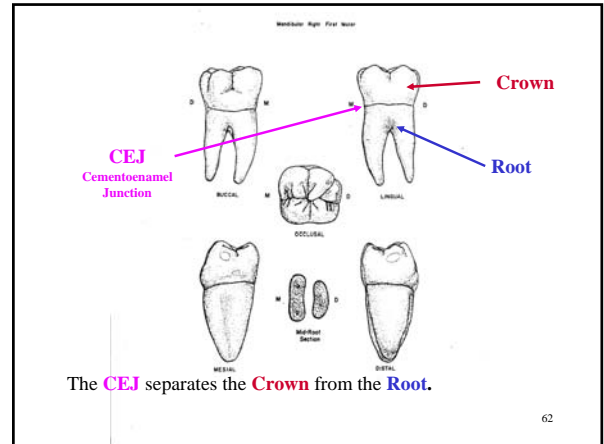

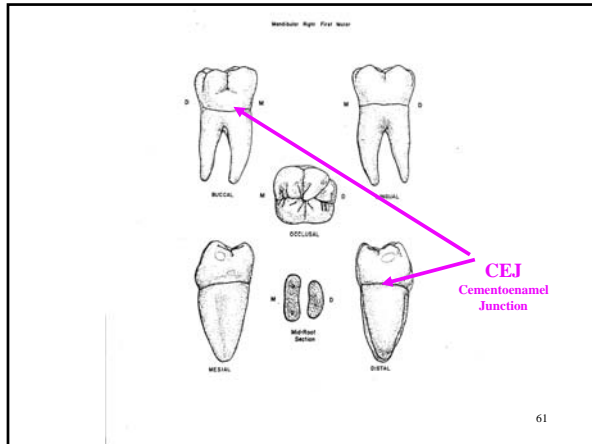

In summary:

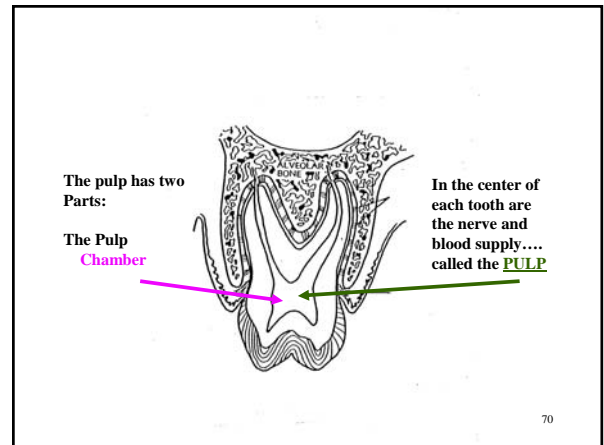

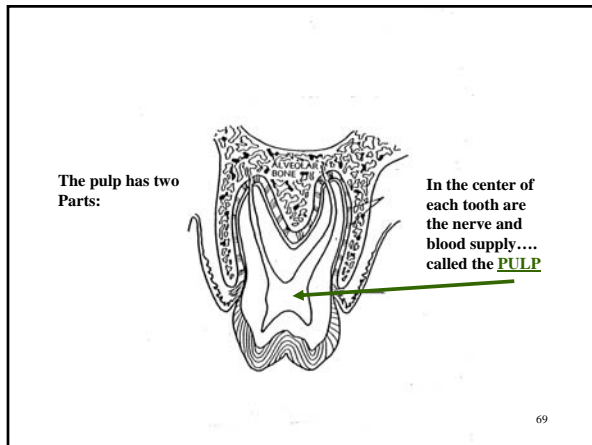

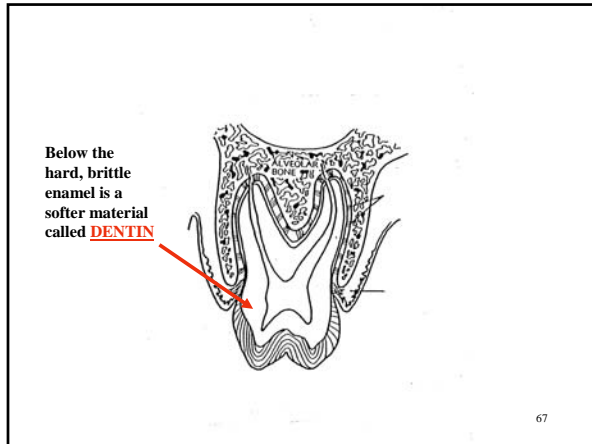

- The surface of the tooth closest to the cheek (face) is called **Facial** surface.
 - **Facial** surface of the POSTERIOR teeth are also called **Buccal** surfaces.
 - **Facial** surface of the ANTERIOR teeth are also called **Labial** surfaces

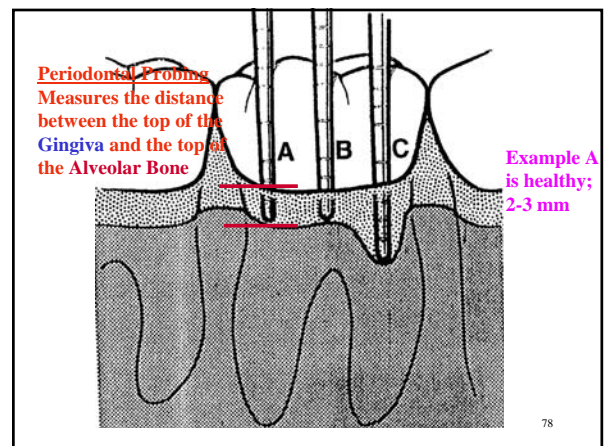

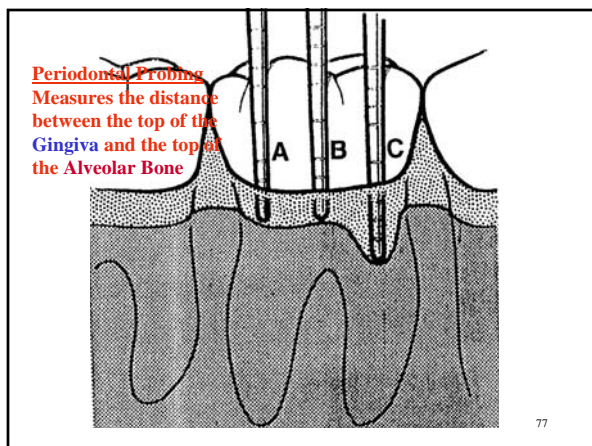

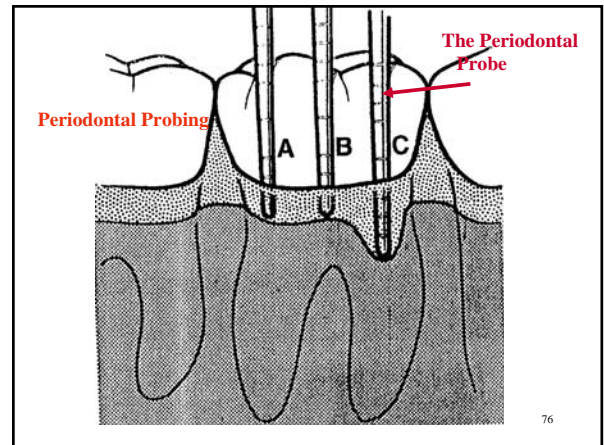

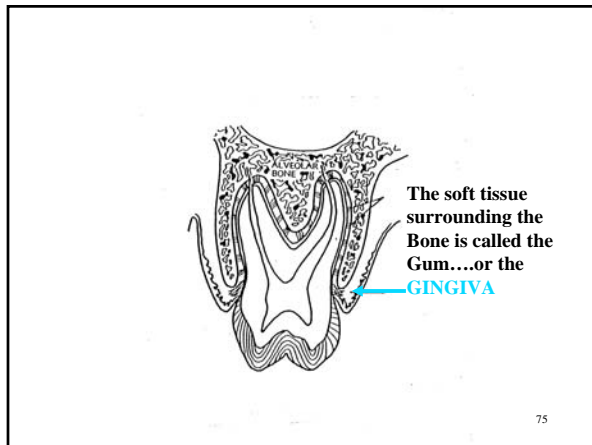

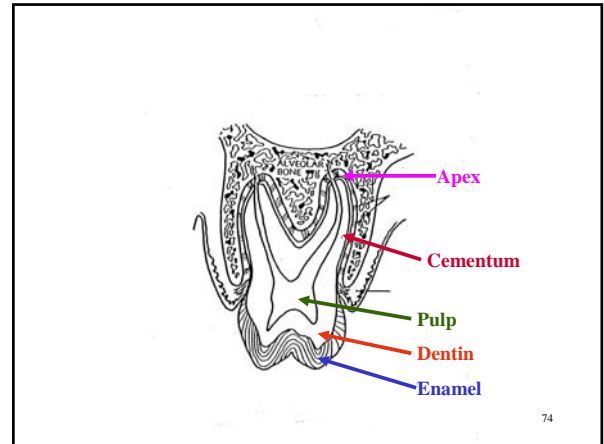

50

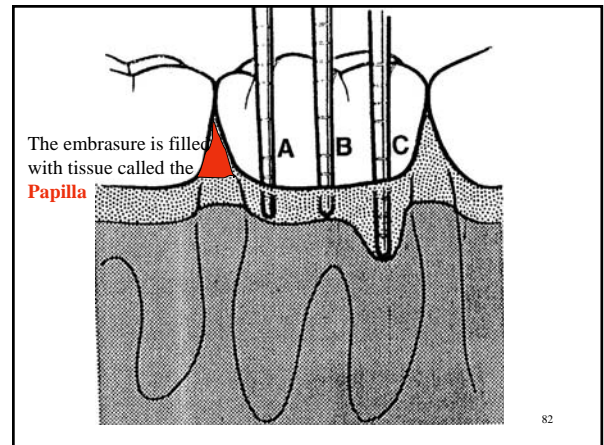

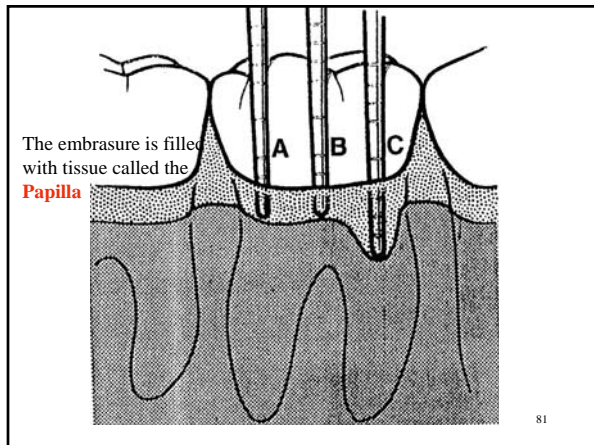

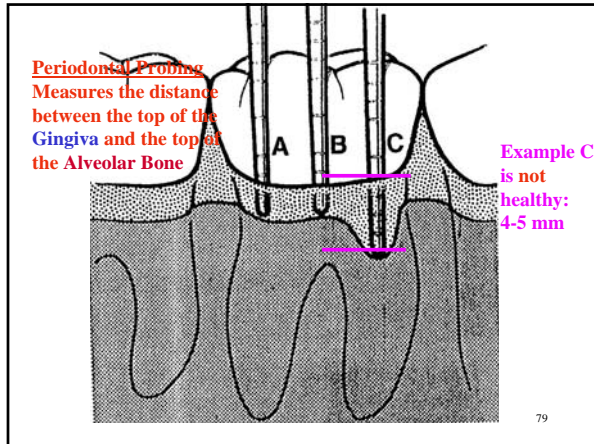

more about the **Gingiva**.....

Free Gingiva
where the gingiva
is not attached to
anything

85

more about the **Gingiva**.....

The space between
the free gingiva
and the tooth is
called the
Gingival Sulcus

86
