Happy New Year and Welcome Back!

At the start of the 2008-2009 academic year, we challenged you to discover and implement innovative strategies by exploring beyond your comfort zone. As we enter the New Year, we hope you continue to advance teaching, learning and leadership through innovative ideas, activities and interventions as we seek to positively impact our students' retention, persistence and success.

In the "Academy", we ask our students to learn new concepts and information and we challenge their perceptions and beliefs. Learning often means change and moving out of one's comfort zone which can generate anxiety and fear. As educators, we believe the same is true for us. We also must continually challenge our perceptions and beliefs as we engage in the process of lifelong learning. And, as we explore beyond our comfort zone, we too will conquer our anxiety and fear by attempting innovative practices and strategies.

In order to continually enhance the knowledge and skills of faculty, staff, and college leadership, we are offering a wide variety of professional development workshops designed to present new learning opportunities that hopefully challenge and encourage us to stretch beyond our comfort zone.

As a part of this effort, we are very excited to work collaboratively with FACCC's Education Institute to host its First *Diversity Conference: Embracing Change*. The conference will debut January 14-15, 2009. The conference will highlight the importance of diversity as a critical and valued part of teaching, research, and retention.

We wish you the best this spring and hope you discover and implement innovative strategies as you

Explore Beyond Your Comfort Zone.

When we experience a death in our lives, returning to work can be a blessing or an exhausting, isolating struggle. Mourning is a natural response but what do we do with our tears and anguish or how do we help our co-workers cope? Death happens, ready or not. Death and illness can show up anytime and they don't take into consideration whether or not you have a lecture or a committee meeting or a critical project due. We live in a culture that subscribes to a "hurry up and get over it" coping strategy. In this workshop we will discuss the journey of grief and give practical advice for what to do or say for our friends in the workplace when they return to work after the funeral. We will learn how to keep our hearts open and to respect their needs while we all carry on.
